

## Our Other Natural Ingredients:

Our **Omega-3 Oil Gels** are based on both flaxseed oil and canola oil. They are excellent sources of essential fatty acids and are highly stable. Both products will deliver the benefits of Omega-3 to hair and skin care formulations.

### **Natunola® Omega-3 Oil Gel 318**

- transparent, light yellow liquid based on canola oil and flaxseed oil

### **Natunola® Omega-3 Oil Gel 310**

- clear, transparent, light yellow gel based on flaxseed oil and canola oil
- contains the natural antioxidant, rosemary extract

Our **Aloe Vera Oil Gels** are made using IASC certified quality aloe vera concentrate powder. The medicinal and therapeutic properties of Aloe Vera make these gels unique ingredients for your formulations.

### **Aloe Vera Oil Gel C1XW**

- made from the whole leaf of the aloe plant
- clear gel

### **Aloe Vera Oil Gel C10XW**

- 10 times the regular strength of Aloe Vera Oil Gel C1XW
- opaque gel
- made from the whole leaf of the aloe plant

Our **Mustard Glucan** is isolated from mustard mucilage and produced from yellow mustard seed using our proprietary processing technology without the use of alcohols. This plant based polysaccharide is clear in appearance and has a fluid-like consistency. It exhibits shear thinning flow behaviour and weak-gel structure and can be used alone as a thickener or in conjunction with an existing gum.

**Mustard Glucan** is an excellent moisturizer.

### **Mustard Glucan 301**

- no alcohol used
- natural water-based polysaccharide
- clear yellow liquid
- excellent moisturizing ingredient
- highly effective in lotions, creams, anti-aging and hair care formulations
- preservative is Dehydroacetic Acid and Benzyl Alcohol and Water

## Customized Ingredients:

Our team of highly skilled chemists and customer service representatives will be glad to help you with information on our botanical ingredients. We also provide customized products and development services to meet your specific ingredient needs.

**Let our team work with you to give your natural products the competitive edge!**

# NATUNOLA

*Delivering Health Naturally*

Natunola has been providing our customers for over a decade with a full line of functional and thermally stable botanical ingredients. Our unique patented technologies have allowed us to fulfill the continually growing desire of the cosmetic and personal care industry to manufacture natural plant-derived products using botanical ingredients.

Our botanical gels and extracts can be incorporated in many types of cosmetic and personal care formulations including liners, shadows, mascaras, lip balms, lipsticks, lip glosses, lotions, creams, cleansers, soaps, body washes, shampoos, conditioners, and scrubs.

These botanical gels and extracts make excellent emollients and can be used as viscosity controlling agents, film formers, and skin conditioners. The botanical gels are less greasy than the petroleum derived petrolatum and have excellent thermostability.

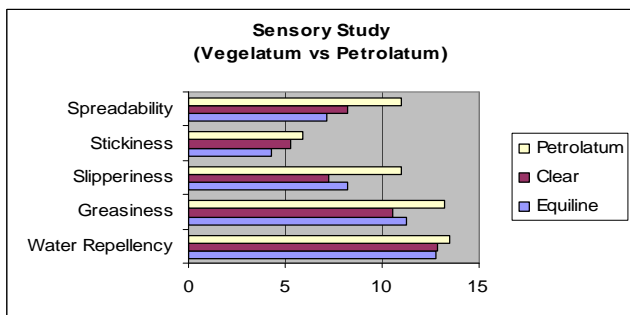

### **Vegetatum® Product Line:**

Natunola's signature line, **Vegetatum®**, is based on a superior, high oleic, non-genetically modified canola oil. Any of the products in this line can be used to directly replace petrolatum in your formulations and also provides a source of Omega-3 fatty acid.

- Vegetatum® Clear RM** • little to no odour clear gel
- Vegetatum® Clear** • clear gel
- Vegetatum® Equiline SF** • soft opaque gel
- Vegetatum® Equiline** • opaque gel

**Sensory studies** have shown that our **Vegetatum®** products perform equally as well or much better than petrolatum.

### **Natunola® Canola Oil**

- the base for our **Vegetatum®** signature line
- high in oleic acid giving a longer shelf life to this already stable oil
- prevents evaporation of moisture from the skin
- can be used as a solvent
- high in vitamin E • excellent emollient • GMO free oil
- source of Omega-3 and Omega-6

### **Natunola® Product Line:**

Our **Natunola®** line of botanical gel products are based on other vegetable oils and can be used to replace petrolatum to create botanically based cosmetic and personal care products.

#### **Natunola® Castor 1023**

- castor oil gel
- pigment wetting properties
- exceptional keeping qualities

#### **Natunola® Soyalatum CRM**

- soy oil gel
- little to no odour

#### **Natunola® CCT 7401**

- coconut-based oil gel
- superior emollient
- clear, colourless and odourless gel

#### **Natunola® Sunflower 1102**

- sunflower seed oil gel
- little to no odour

### **Natunola® Flax Extract Product Line:**

Using our proprietary processing technology, **Natunola® Flax Extracts** are developed from flaxseed. Our extracts leave the skin feeling remarkably smooth and silky, making it an excellent emollient for cosmetic, skin care, hair care and personal care formulations.

#### **Natunola® Flax Protein/ProExtract**

- clear, transparent liquid
- contains mainly water soluble protein
- little to no odour
- skin conditioner
- exceptional moisturizer

#### **Natunola® Flax Extract 130/230**

- opaque, beige liquid
- concentrated flax gum
- skin conditioner
- excellent emollient
- viscosity controlling agent

#### **Natunola® Flax Extract 160/260**

- clear, transparent liquid
- lower viscosity flax gum
- less concentrated version
- skin conditioner and emollient

**Natunola® Flax Extracts 130 and 160** and **Natunola® Flax Protein** all have the preservative DMDM Hydantoin and Iodopropynyl Butylcarbamate.

Our newer series of extracts, namely **Natunola® Flax Extracts 230 and 260** and **Natunola® Flax ProExtract** are available with the preservative Dehydroacetic Acid and Benzyl Alcohol and Water, making them acceptable worldwide.
