

## **Natunola Health Biosciences Inc.: Corporate Press Release**

### **Natunola Release Q2 and its First Six Months Results**

Winchester, ONTARIO--(August 15, 2008)

Natunola Health Biosciences Inc. (TSX-V:NHI) ("Natunola") (formerly Sentex Systems Ltd.) reports that the revenue for the quarter ended on June 30, 2008 was \$573,137 as compared to \$558,862 for the comparative period for 2007. There was a small increase in revenue; however, due to the increase cost of sales and the higher sales and marketing expenses, the Company had a net loss of \$44,800 or \$0.00 per share for the quarter ended on June 30, 2008 as compared to a net loss of \$26,017 or \$0.00 per share for the comparative period for 2007.

The increase cost of sales is due to the increasing fuel cost and higher commodity prices. As a result, the Company will increase the product selling prices during the third quarter. The higher sales and marketing expenses is due to the cost associated with extensive launch of the Company new retail flax product line.

The sales of the Company's flax products continued to grow and increased by \$156,199 or 46.2% for the quarter ended June 30, 2008 versus the comparative period for 2007. The sales of the Company's cosmetic and personal care products decreased by \$68,510 or 51.4% for the quarter ended June 30, 2008 versus the comparative period for 2007. The decrease is due to the fewer shipment of the Company cosmetic and personal care products to the US market.

General expenses declined by \$72,025 or 10.3% for the first half ended June 30, 2008 versus the comparative period for the first half ended June 30, 2007. The decrease is due to lower expenses in both general and administrative cost and the research and development cost.

Gross margins decreased slightly by 1.5% for the first half ended June 30, 2008 versus comparative period for 2007. The decrease in gross margins is due to the increasing fuel cost and the higher commodity cost and the higher sales and marketing cost.

The sales of the Company's flax products increased by \$352,363 or 53.2% for the first half ended June 30, 2008 versus the comparative period for 2007. The sales of the Company's cosmetic and personal care products decreased by \$97,260 or 36.2% for the first half ended June 30, 2008 versus the comparative period for 2007. As a result of these, and despite the lower revenue in the cosmetic and personal care products, the Company still recorded a net profit of \$95,289 or \$0.01 per share for the first half ended June 30, 2008 as compared to a net loss of \$2,079 or \$0.00 per share for the comparative period for 2007.
