Natunola Omega-3 Flax Brings Third Consecutive Quarterly Profit to Sentex

Winchester, ONTARIO--(May 20, 2008)

Sentex Systems Ltd. (TSX-V:SXS) ("Sentex") reports that the revenue for the three months ended on March 31, 2008 increased by 10% and was \$626,662 as compared to \$568,591 for the comparative period for 2007. The increase in revenue is due to the increase in sales of the Company's Natunola omega-3 flax products during the period. Sales of flax products increased \$194,944 or 60% for the quarter ended March 31, 2008 versus the comparative period for 2007. The sales for the Company's personal care product lines decreased by 20% or \$27,530 for the three months ended March 31, 2008 versus the comparative period for 2007. The decline is a result of fewer orders in Q1 2008.

There is no sale for the Company's animal product lines during this quarter. Despite this, the Company still recorded a solid increase in total sales and thus a net profit for the quarter ended March 31, 2008.

Cost of sales remained relatively competitive in the current three months and, as a result, gross margins remained fairly stable (63.2% at March 31, 2008 to 63.1% at March 31, 2007). General expenses declined \$79,260 or 24% for the three months ended March 31, 2008 versus the comparative period for the three months ended March 31, 2007. General expenses are net of a foreign exchange gain of \$30,407 (\$4,791 foreign exchange loss in Q1 2007).
