

Sentex Announces the Completion of the Sale of Certain Assets of NutriBios Corp. and the Change of Name of NutriBios Corp. to Natunola Health Inc.

Winchester, Ontario--(November 16th, 2007)

Sentex Systems Ltd. ("Sentex") (TSX:SXS) reports today that it has completed the sale of certain assets to Oshawa Specialty Products Ltd. from its wholly owned subsidiary NutriBios Corp. As reported earlier, sales of NutriBios' animal nutritional product lines have been negatively impacted by staff turnovers. In order to better serve the corporate business plan and existing customers, Sentex has sold the animal product lines that are inactive or operating at a loss.

The Purchaser has required a transfer of the name NutriBios Corp. in order to avoid potential confusion in the marketplace. As a consequence, the Board of Directors of Sentex resolved to change the name of NutriBios Corp. to Natunola Health Inc. The subsidiary's products, including certain animal nutritional product lines, Vitamix, Ascogen®, flaxseed related products and products for export to Egypt, will be marketed and sold under the Natunola name.

With the completion of the sale, management of Natunola Health Inc. will focus on the expansion of the subsidiary's profitable human nutritional and personal care flaxseed products.

About the Company:

Sentex Systems Ltd. and its manufacturing plant are located in Winchester, Ontario. It is the parent company of Natunola Health Inc.

Natunola Health Inc. is a leading manufacturer and researcher in the field of flax seed derived omega -3 fatty acids, specialty natural products, bio-nutrients and functional supplements for human nutritional and animal nutritional markets. The Company also produces natural ingredients for the cosmetic and personal care industry.

Some of the statements contained in the release are forward-looking statements, such as estimates and statements that describe the Company's future plans, objectives or goals, including words to the effect that the Company or management expects a stated condition or result to occur. Since forward-looking statements address future events and conditions, by their very nature, they involve inherent risks and uncertainties. Actual results in each case could differ materially from those currently anticipated in such statements.
