

Natunola® Flax ProExtract *Sustainable*

Flax protein extracts are isolated from flaxseed using a patented non-chemical process, and consists of naturally occurring water soluble protein (non-hydrolyzed). These extracts have shown to visibly improve the appearance of dry and damaged hair and provide moisturization to the skin.

Functional

Cost effective

INCI Name	Water (and) Linum Usitatissimum (Linseed) Seed Extract
Recommended Uses	Hair care – Imparts shine, gloss and repairs split ends Skin care – Imparts moisturization
Recommended Usage Levels	1 – 15%
Pack Sizes Available	21 kg pails or 200 kg drums
