

Soyalatum CRM

Sustainable

Functional

Cost effective

Vegetatum® vegetable gels are proven, functional alternatives to petrolatum in a variety of personal care formulations. They consist of a proprietary vegetable gel technology using natural ingredients.

Soyalatum CRM leverages non-GMO Soybean oil which provides excellent film forming, viscosity building and superior skinfeel and is the most cost-effective product in the Vegetatum® line today. This product will also build viscosity in anhydrous systems and is ideally suited for mass market personal care.

INCI Name	Glycine Soja (Soybean) Oil (and) Zea Mays (Corn) Starch (and) Silica
Recommended Uses	Mass market products as a petrolatum replacement Anhydrous products to build viscosity and improve stability
Recommended Usage Levels	1 – 5% as petrolatum replacement 10% + in anhydrous products
Pack Sizes Available	21 kg pails or 195 kg drums

Appearance	Transparent, light yellow gel
Odour	Light, characteristic
Solubility	Soluble in all vegetable oils, glycerol triisostearate, isostearyl isostearate, oleic acid, isostearic acid, coco-caprylate/caprates and mixed glycerides. Insoluble in water, absolute ethanol, 1,2 propanediol, dimethicone
Bacteriological Data	Bacterial count (aerobic) <100 cfu/g
pH (1:20 water emulsion)	4.6 - 6.6
Stability	Store below 21°C in sealed containers. Shelf life is 1 year from ship date
Formulating Recommendations	Formulate at pH range of 3-8 and temperature range of 25°C - 80°C (75°C ideal)
