

Aloe Vera Oil Gel C10XW

Sustainable

Functional

Cost effective

Natunola's vegetable gels are proven, functional alternatives to petrolatum in a variety of personal care formulations. They consist of a proprietary vegetable gel technology using natural ingredients.

Aloe Vera Oil Gel C10XW is synthesized using powder from the purified leaf of the Aloe Barbadensis Miller plant. This gel has high thermostability and allows a much higher concentration of Aloe Vera Extract to be incorporated into cosmetic and personal care formulations.

INCI Name	Canola Oil (and) Aloe Barbadensis Leaf Juice
Recommended Uses	Lipcare and Skincare products to deliver the soothing and healing properties of Aloe Vera in a stable vegetable gel format
Recommended Usage Levels	1 – 10%
Pack Sizes Available	21 kg pails
